

SMS FLATSCREEN WM T

A tilting bracket for universal use.

A wall bracket that can be used with an extended range of VESA standards, from 100 x 100 to 400 x 400, thus making it compatible with most popular screen sizes. The SMS WM T gives flexibility to your screen, such that you can either mount it flush with the wall or tilt it in stepless increments up to 15° forwards. This offers an advantage, for example, when the screen will be mounted high on the wall. The bracket is largely constructed from aluminium, which contributes to a stylish and discrete impression. Max. load: 30 kg.

QUESTIONS AND ANSWERS

The product can be tilted, so how close to the wall can you come with this bracket?

The distance from wall to screen can be as little as 36 mm when the screen is in its vertical position.

The maximum load is 30 kg., but how much does the bracket itself weigh?

The SMS Flatscreen WM T weighs 2.2 kg.
